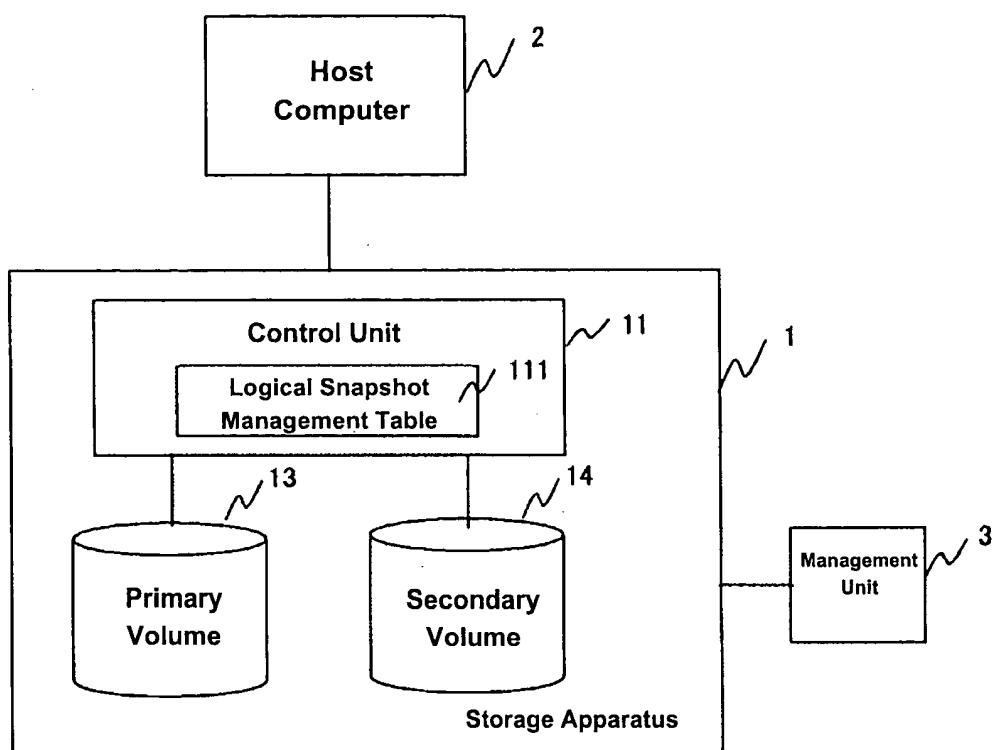

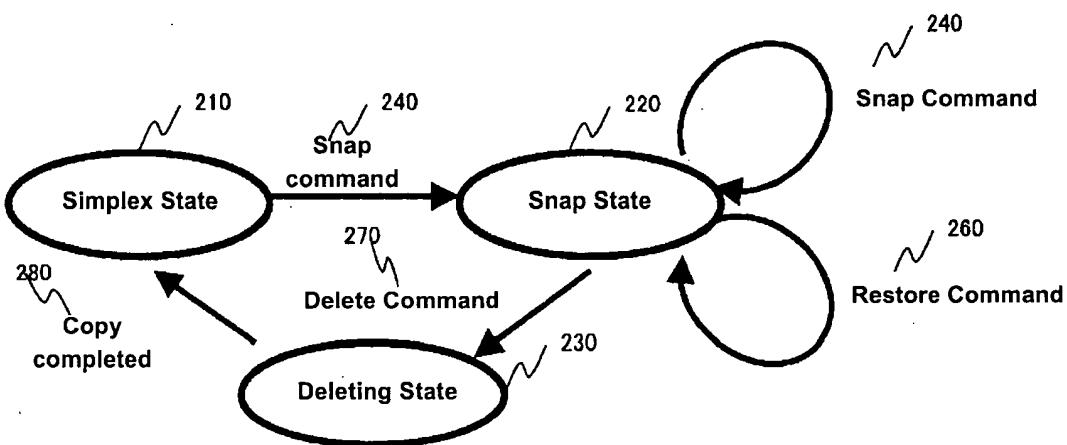

Fig. 2

**Fig. 3**

The diagram illustrates a storage apparatus with two matrices: Primary Volume BM (P) and Secondary Volume BM (S). The Primary Volume BM (P) is a 6x6 matrix with rows labeled  $yp_1$ ,  $yp_2$ ,  $yp_3$ ,  $\vdots$ , and columns labeled  $xp_1$ ,  $xp_2$ ,  $xp_3$ ,  $\dots$ . The matrix contains only zeros. The Secondary Volume BM (S) is a 6x6 matrix with rows labeled  $ys_1$ ,  $ys_2$ ,  $ys_3$ ,  $\vdots$ , and columns labeled  $xs_1$ ,  $xs_2$ ,  $xs_3$ ,  $\dots$ . The matrix contains only ones. Above the matrices, there are annotations:  $300$  is associated with the  $xp$  columns and  $301$  is associated with the  $xs$  columns. The number  $111$  is written above the  $xs$  columns. Ellipses ( $\dots$ ) are placed to the right of the  $xs$  columns and below the  $ys$  rows.

Primary Volume BM (P)						Secondary Volume BM (S)					
	$xp_1$	$xp_2$	$xp_3$	$\dots$			$xs_1$	$xs_2$	$xs_3$	$\dots$	
$yp_1$	0	0	0	0	0	0	1	1	1	1	1
$yp_2$	0	0	0	0	0	0	1	1	1	1	1
$yp_3$	0	0	0	0	0	0	1	1	1	1	1
$\vdots$	0	0	0	0	0	0	1	1	1	1	1
	0	0	0	0	0	0	1	1	1	1	1

**Fig. 4**

Primary Volume BM (P)						Secondary Volume BM (S)					
	xp1	xp2	xp3	.....	300	xs1	xs2	xs3	.....	301	111
yp1	0	0	0	0	0	0	0	0	0	0	
yp2	0	0	0	0	0	0	1	1	1	1	
yp3	0	0	0	1	1	1	0	0	0	0	...
...	1	1	1	1	1	1	0	0	0	0	
	0	0	0	0	0	0	0	0	0	1	
	⋮					⋮
